Cloud migration (Cloud Migration, CMG) is a migration tool integration and monitoring platform provided by Tencent Cloud. This service provides Tencent Cloud's official migration tool and integrates officially certified third-party migration tools, helping users conveniently and efficiently migrate systems to the cloud. Meanwhile, users can clearly grasp the migration progress.

Product Feature

Unified Monitoring

In cloud migration, perform unified monitoring of all migration tasks and show them in an aggregated way according to migration types, helping users not be overwhelmed by complex migration data during large-scale complex migrations.

Visual Operation

The status of ALL migration tasks can be checked through visual charts. The Friendly human-machine interaction interface clearly shows migration information from different dimensions, helping users clearly understand the migration situation.

Simple Management

In cloud migration, migration tasks can be managed by project group. Whether it is migrating in batches across time periods or performing a one-time large-scale migration of a complete system, the monitoring is likewise well-organized.

Extensive Support

Besides Tencent's official migration solutions and tools, numerous partners are integrated to provide users with various migration options. Regardless of whether it is official or third-party, seamless connection can be achieved.

Reliability Certification

Tencent Cloud strictly evaluates and certifies the capabilities and migration experience of third-party migration tools to ensure that the selected solutions and tools are secure and reliable, and business migration is flawless.

Use Cases

Last updated: 2025-03-21 17:30:21

Tencent Official Migration Tool

Tencent official migration tools seamlessly integrate with cloud migration. Migration tasks created in any official migration tool can be directly seen in cloud migration with their information and status without any action.

Partner Migration Tool

To meet users' complex migration requirements, Tencent Cloud has assessed and certified a number of partners that can provide migration solutions and migration tools. Users can adopt customized migration solutions from partners or use only third-party tools provided by partners.

All certified partners' tools are integrated with cloud migration. Any migration task of the user can be seen in cloud migration with its information and status.

Develop Your Own Migration Tool

The integration standards and SDK of cloud migration are planned to be open to users. At that time, all self-developed migration tools of users just need to follow the standards to call the SDK and can perform unified monitoring and management through cloud migration.
