# Quick Start

Last updated: 2025-03-21 17:30:22

Cloud migration is a support tool for enterprise cloud adoption. It is dedicated to providing one-stop cloud migration services for enterprises with cloud migration needs and helping customers simplify and accelerate the cloud migration process.

## Prerequisites

You have registered a Tencent Cloud account and completed identity verification.

- If you need to sign up for a Tencent Cloud account: click here [Sign up for a Tencent Cloud account](#).
- If needed to complete real-name authentication: Click here to complete [real-name authentication](#).

## Research and Analysis

If you are in the preliminary planning stage of cloud resource migration, it is recommended that you enter [Cloud Migration console](#) and use [collection tool](#). Use platform services in the following sequence:

1. Create a resource research task to complete the information research of various types of cloud resources in other clouds, including resource name, data type, specification and a series of other information, to provide a basis for subsequent cloud migration analysis.
2. According to the researched resource information, complete the automatic [selection and design](#). The platform will automatically recommend more suitable Tencent Cloud resources based on the configuration information such as region and performance of the source-end resources. It simultaneously supports users in custom adjustment configuration of the recommended resources.
