Billing Overview

Last updated : 2025-03-26 16:41:56

SSM provides an annual and monthly billing mode, and SSM uses keys managed by [KMS](#) to encrypt. During use, this may result in additional charges. For details, see [KMS Billing Overview](#).

SSM (New Billing)

Note:

Region 1 can provide services in the Beijing, Shanghai, and Guangzhou regions.

Region 2 can provide services in Hong Kong (China), Singapore, Jakarta, and Tokyo.

Item	Description	Unit Price (USD/Month) Region I	Unit Price (USD/Month) Region II
Enterprise Edition	Managed credential: 1000 Compute performance: 500 QPS	366	529
Compute Performance	Compute performance: 500 QPS	92	139

SSM (Old Billing)

Note:

New purchasers of SSM no longer support Old Billing.

Secrets Manager (SSM) charges credential storage fees and API call fees.

SSM is a **pay-as-you-go** service that billed on a monthly basis. Fees of a month are calculated, billed, and charged on the 3rd to 5th days of the following month.

Credential Storage Fees

Storing credentials created in SSM generates credential storage fees.

Credential storage fees are **calculated by day and billed by month**. The number of credentials under an account is used to calculate the daily fees, and the bill is generated by month.

Pricing details:

Item: Credential storage

Price: 0.4 USD/credential/month

Note:

Quota: Each account can have up to 1000 credentials. If you need to create more credentials, please [submit a ticket](#) or [contact the sales representative](#).

Credential status: Only enabled and disabled credentials are charged.

API Call Fees

SSM API call fees are **calculated and billed by month**. The accumulated number of API calls is calculated and billed monthly.

Pricing details:

Item: Number of API calls

Price: 0.05 USD/10,000 calls

Note:

If the accumulated number of API calls is below 10,000, it will be rounded up to 10,000 calls.

API calls of each region are calculated separately.

Billing Examples

The example below shows you how the SSM fees are calculated:

A user has created 100 credentials (e.g., database credentials, SSH keys, third-party API keys, and OAuth tokens) in SSM and called each one for 20 times on average each day, then the SSM fees generated this month are calculated as:

Credential storage fees: $0.4 \text{ (USD/credential/month)} * 100 = 40 \text{ USD}$

API call fees: $20 \text{ (calls)} * 100 \text{ (credentials)} * 30 \text{ (days)} * 0.05 \text{ (USD/10,000 calls)} = 0.3 \text{ USD}$

Total: $40 \text{ USD} + 0.3 \text{ USD} = 40.3 \text{ USD}$

Purchase Methods

Last updated : 2025-03-26 16:41:56

1. Log in to Tencent Cloud and go to the [SSM Purchase Page](#).
2. Choose region, quantity of secret and compute performance on the purchase page. Read and select the related pricing description.
3. Click **Purchase Now**.

Overdue Payment Policies

Last updated : 2024-01-02 15:07:13

Note:

If you are a customer of a Tencent Cloud partner, the rules regarding resources when there are overdue payments are subject to the agreement between you and the partner.

Notification

When your account is overdue, notifications for service suspension will be sent to your Tencent Cloud account creators and all collaborators through email and SMS on the day of and after expiration.

Service Suspension

Your SSM service will be suspended 24 hours after your account becomes overdue. At this time, your access to SSM will be denied, but your secret data will be retained. After the service is suspended, secret storage and API calls will not incur fees.

Resource Repossession

Secret resources will be released 168 hours (7 days) after account suspension. To use your secrets, please pay the overdue payment as soon as possible.
