Purchase Guide
Billing Overview

Last updated：2024-02-02 16:27:14

You can estimate the cost of TencentCloud Managed Service for Prometheus (TMP) resources by referring to the billing documentation.

Billing Mode

TMP supports the pay-as-you-go billing mode:

Billing Mode	Payment Mode	Applicable Scenario	Billing Formula
Pay-as-you-go	Postpaid mode, that is, you can apply for resources as needed first, and fees will be charged based on the actual resource usage.	It is suitable for businesses that may fluctuate greatly and instantaneously. In this mode, instances can be released immediately after use so as to reduce the cost.	Total fees = daily reported metric data volume (in million entries) x unit price + traffic fees (currently free of charge)

©2013-2022 Tencent Cloud. All rights reserved.

Pay-as-You-Go (Postpaid)
Pay-as-You-Go Description

Last updated：2024-08-27 16:44:41

TencentCloud Managed Service for Prometheus (TMP) is available for purchase in many major regions, and the service price may change across regions depending on different promotional activities or pricing strategies.

Pricing

Calculation Formula

Total fees = daily reported metric data volume (in million entries) x unit price + traffic fees (currently free of charge)

Billing Items

Billing Item	Description
Average reported metric data volume	Tiered pricing based on the reported metric data volume
Traffic	Public network traffic, which is currently free of charge

Free Metrics

Some metrics are free of charge in the pay-as-you-go mode. For details, see Free Metrics in Pay-as-You-Go Mode.

Instance Price

Unit Price for 15-Day Data Storage

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0 - 200 million	$0.19 per million
200 - 800 million	$0.12 per million
800 - 1,500 million	$0.06 per million
Above 1,500 million	$0.05 per million

Unit Price for 30-Day Data Storage

©2013-2022 Tencent Cloud. All rights reserved.

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0 - 200 million	$0.22 per million
200 - 800 million	$0.16 per million
800 - 1,500 million	$0.11 per million
Above 1,500 million	$0.08 per million

Unit Price for 45-Day Data Storage

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0 - 200 million	$0.25 per million
200 - 800 million	$0.2 per million
800 - 1,500 million	$0.12 per million
Above 1,500 million	$0.09 per million

Note:

Storage for 90 days, 180 days, 1 year, and 2 years will be charged according to the instance region.

Unit Price for 90-Day Data Storage

Domestic non-financial areas, such as Guangzhou, Shanghai, and Beijing

Range of Average Reported Metric Data Volume (in million entries)	Price (USD)
0 - 200 million	$0.22 per million
200 - 800 million	$0.19 per million
800 - 1,500 million	$0.17 per million
Above 1,500 million	$0.16 per million

Finance zones in the Chinese mainland and outside the Chinese mainland (Hong Kong (China), Macao (China), Taiwan (China), and overseas), such as Hong Kong (China) and Singapore

Range of Average Reported Metric Data Volume (in million entries)	Price (USD)
0 - 200 million	$0.43 per million
200 - 800 million	$0.37 per million

©2013-2022 Tencent Cloud. All rights reserved.

800 - 1,500 million	$0.34 per million
Above 1,500 million	$0.31 per million

Unit Price for 180-Day Data Storage

Domestic non-financial areas, such as Guangzhou, Shanghai, and Beijing

Range of Average Reported Metric Data Volume (in million entries)	Price (USD)
0 - 200 million	$0.36 per million
200 - 800 million	$0.33 per million
800 - 1,500 million	$0.31 per million
Above 1,500 million	$0.30 per million

Finance zones in the Chinese mainland and outside the Chinese mainland (Hong Kong (China), Macao (China), Taiwan (China), and overseas), such as Hong Kong (China), and Singapore

Range of Average Reported Metric Data Volume (in million entries)	Price (USD)
0 - 200 million	$0.71 per million
200 - 800 million	$0.65 per million
800 - 1,500 million	$0.62 per million
Above 1,500 million	$0.59 per million

Unit Price for One-Year Data Storage

Domestic non-financial areas, such as Guangzhou, Shanghai, and Beijing

Range of Average Reported Metric Data Volume (in million entries)	Price (USD)
0 - 200 million	$0.83 per million
200 - 800 million	$0.79 per million
800 - 1,500 million	$0.75 per million
Above 1,500 million	¥0.74 per million

Finance zones in the Chinese mainland and outside the Chinese mainland (Hong Kong (China), Macao (China), Taiwan (China), and overseas), such as Hong Kong (China) and Singapore

©2013-2022 Tencent Cloud. All rights reserved.

Range of Average Reported Metric Data Volume (in million entries)	Price (USD)
0 - 200 million	$1.65 per million
200 - 800 million	$1.57 per million
800 - 1,500 million	$1.49 per million
Above 1,500 million	$1.47 per million

Unit Price for Two-Year Data Storage

Domestic non-financial areas, such as Guangzhou, Shanghai, and Beijing

Range of Average Reported Metric Data Volume (in million entries)	Price (USD)
0 - 200 million	$1.81 per million
200 - 800 million	$1.76 per million
800 - 1,500 million	$1.71 per million
Above 1,500 million	$1.70 per million

Finance zones in the Chinese mainland and outside the Chinese mainland (Hong Kong (China), Macao (China), Taiwan (China), and overseas), such as Hong Kong (China) and Singapore

Range of Average Reported Metric Data Volume (in million entries)	Price (USD)
0 - 200 million	$3.61 per million
200 - 800 million	$3.51 per million
800 - 1,500 million	$3.42 per million
Above 1,500 million	$3.4 per million

Billing items

The pay-as-you-go cost for Prometheus depends on the amount of data reported by users. The unit price per amount of reported data varies depending on the storage duration.

©2013-2022 Tencent Cloud. All rights reserved.

Definition of reported data amount: It is the total amount of metric data collected and reported. A single metric data includes the metric name, label set, sampling timestamp, and value. Metric data is logically organized in the timeline (Series) form.
Timeline (Series) Definition: It is composed of metric name and tag. The same metric name and tag constitute a unique timeline in the time series.
Example
Suppose you need to collect and report 10 types of node-level metrics, and your cluster contains 200 nodes. This will generate 2000 timelines (Series). If the data collection interval is 15 seconds, the daily reported data volume is:
Reported Data Volume = 2000 × (60 seconds × 60 minutes × 24 hours) / 15 seconds = 11.52 million
11.5 million falls in the first price range (0-200 million). The unit price for data storage for 15 days is $0.19, so **daily cost = 11.52 × 0.19 ≈ $2.18** (rounded to two decimal places).

Billing Examples

Example 1 (less than 200 million reported metric data entries)
Suppose 60 million entries of metric data are reported a day, and the data retention period is specified as 15 days, then the daily fees = 60 × 0.19 = 11.4 USD.
Note: “60” in the above formula indicates 60 million metric data entries.
Example 2 (more than 200 million reported metric data entries)
Suppose 900 million entries of metric data are reported a day, and the data retention period is specified as 30 days, then the daily fees are calculated in a tiered manner as follows:
For the first 200 million metric data entries, the fees = 200 x 0.25 = 50 USD
For the 200-800 million metric data entries, the fees = (800 - 200) x 0.2 =120 USD
For the 800-900 million metric data entries, the fees = (900 -800) x 0.12 = 12 USD
Therefore, the total fees = 50 + 120 + 12 = 182 USD
Note: “900” in the above formula indicates 900 million metric data entries.

Relevant Documentation

You can purchase TMP instances through the console. For more information, see Purchase Methods.
TMP sends alert messages to you before it expires and its resources are repossessed. For more information, see Payment Overdue.

Billing Rules for Free Metrics Exceeding Free Storage Period

Last updated：2024-01-29 15:55:08

TencentCloud Managed Service for Prometheus (TMP) will change the free metric storage period of pay-as-you-go instances as described in Free Metrics in Pay-as-You-Go Mode to **15 days** on **November 30, 2022**. **For TMP instances with storage period over 15 days, their metrics will be charged for the extra storage days**.

Note:

To check the free metrics you have used or streamline monitoring metrics to avoid unnecessary expenses, see Streamlining Monitoring Metrics.

Storage Pricing

Calculation formula

Storage fees = storage unit price * (data storage period - 15 days) * daily reported metric data volume in million entries

Settlement cycle

Fees are settled on a daily basis.

Storage unit price

Region	Unit Price (USD/million entries)
Non-finance zones in the Chinese mainland, such as Guangzhou, Shanghai, and Beijing	0.0015
Regions outside the Chinese mainland + finance zones in the Chinese mainland, such as Hong Kong (China), Singapore, and Shenzhen Finance	0.003

Note:

Data entry count less than one million will be calculated as one million.

Billing Example

©2013-2022 Tencent Cloud. All rights reserved.

Let’s suppose a user has purchased a TMP instance in a non-finance zone in the Chinese mainland, the data storage period is 45 days, and the number of reported metric data entries is 10 million a day, then:
The storage fees for that day = 0.0015 * (45-15) * 10 = 0.45 USD

Free Trial Introduction

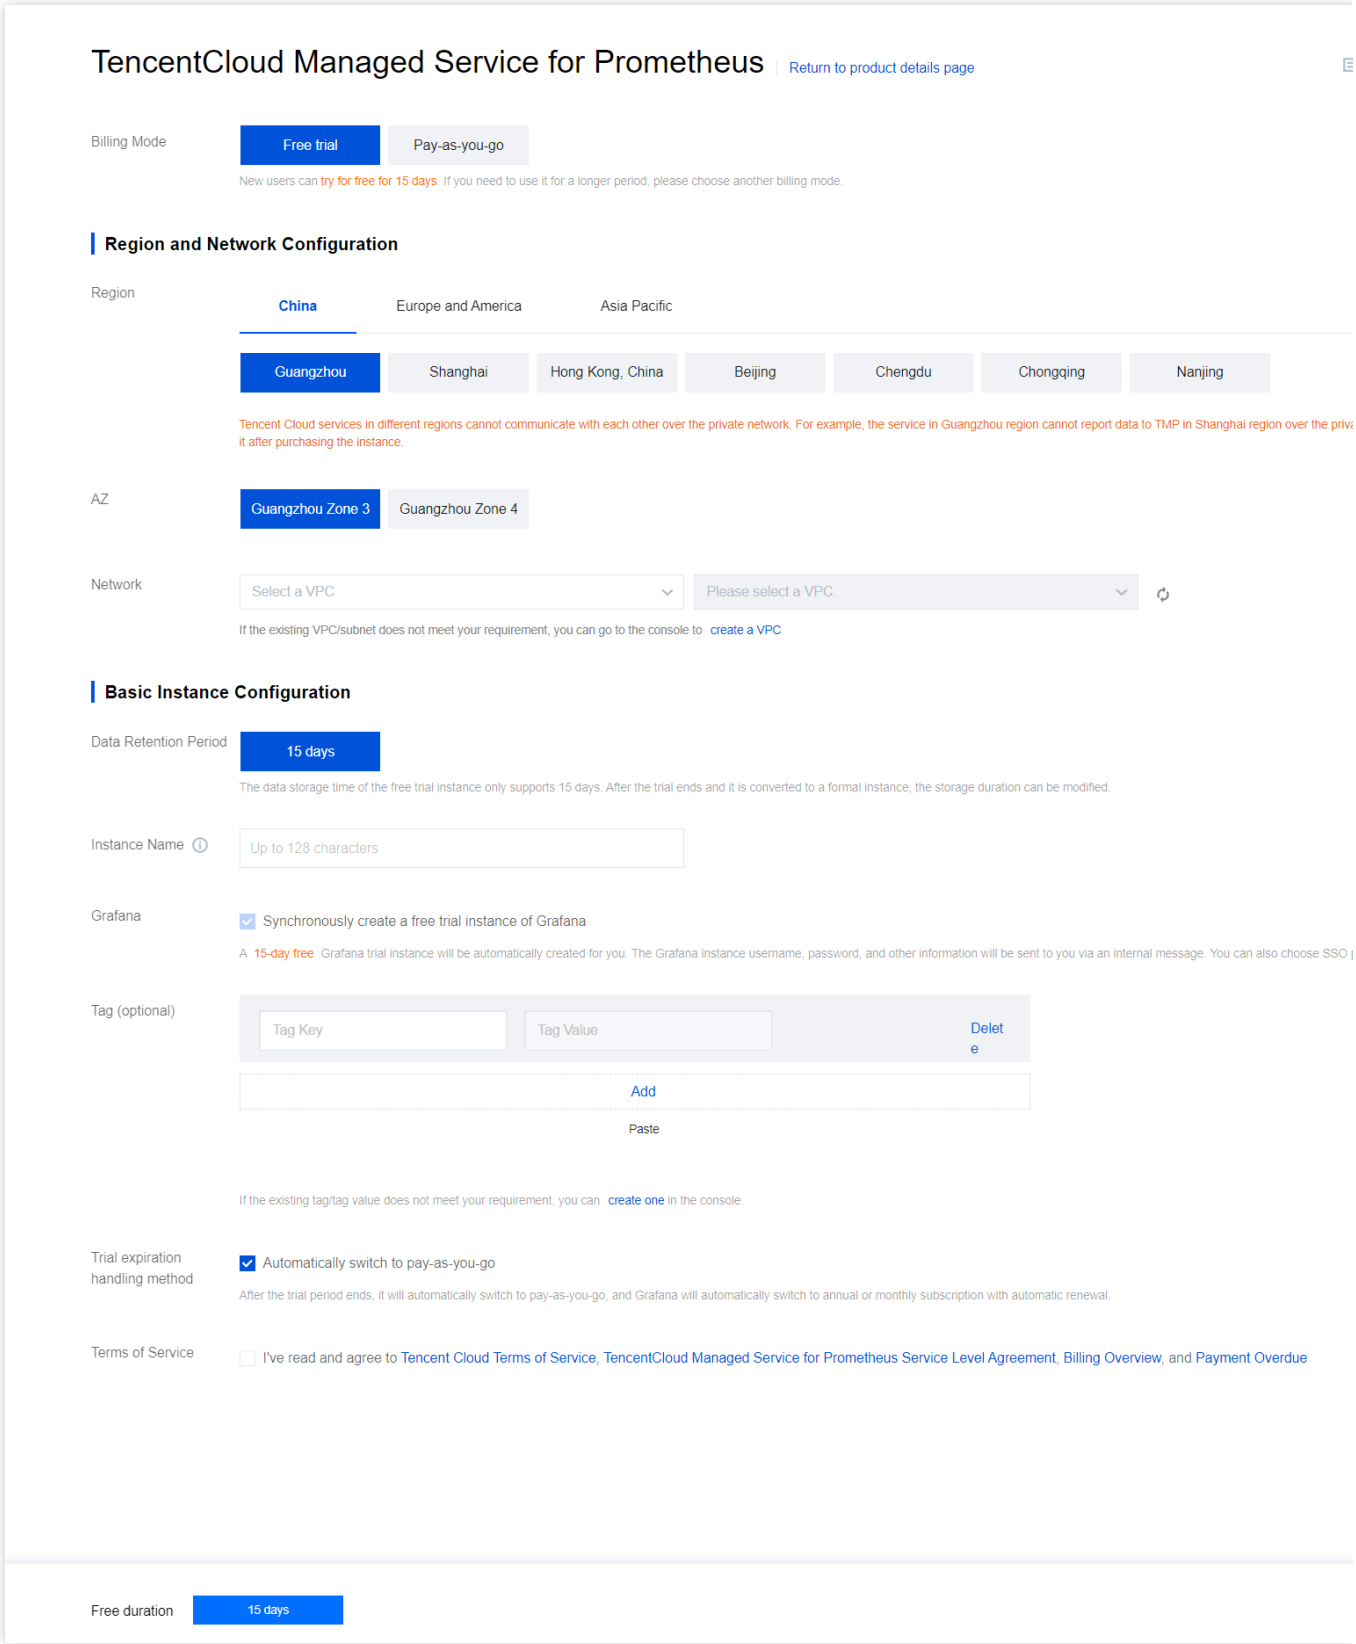
Last updated：2024-07-31 15:26:11

TencentCloud Managed Service for Prometheus (TMP) offers a 15-day free trial to help new users understand and use Prometheus. This trial is supported in multiple cities, both domestically and internationally. You are welcome to experience it.

Directions

1. log in to TMP Console.
2. On the Prometheus monitoring page, click **Free trial** to jump to the corresponding purchase page.
3. On the purchase page, fill in the required information, select terms and conditions, and click **Buy Now** to start the trial.

©2013-2022 Tencent Cloud. All rights reserved.



Configuration Instructions

Configuration Type	Configuration Item	Description

©2013-2022 Tencent Cloud. All rights reserved.

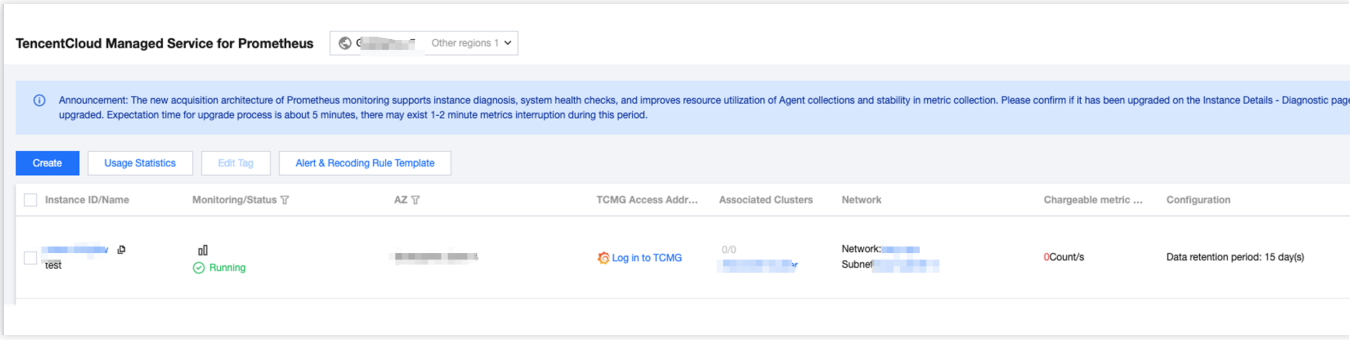
Billing mode	Free trial	New users can enjoy a 15-day free trial. If you need to use it for a longer period, please choose a different billing model.
Data storage duration	15 days	The data storage period for the free trial instance is limited to 15 days. After the trial and conversion to a formal instance, the storage duration can be modified.
Grafana	Create free trial Grafana instances simultaneously	Selected by default. A free 15-day Grafana trial instance will be automatically created for you. Grafana instance username, password, and other information will be sent to you via the Message Center. You can also choose SSO for password-free login.
Trial expiry handling method	Automatically convert to Pay-As-You-Go	Selected by default. The trial will automatically convert to a Pay-As-You-Go model after the trial, and Grafana will switch to an annual/monthly automatic renewal. If you deselect it manually, the service will be stopped upon expiration.

Note:

The maximum limit for Series of the free trial instance is 2 million, and the total data points reported per second cannot exceed 100,000. For more detailed limit descriptions, see Related Limits.

Instance Information

1. After successfully purchasing the instance, you can be redirected to the instance list page, as shown in the figure below:



2. Click the instance ID/name to enter the instance details page.

Managed Collector Billing Introduction

Last updated：2024-08-27 16:44:41

Note:
Based on use cases, integration Tencent Kubernetes Engine (TKE) and integration center can be differentiated:
Integration TKE: Collector resources can be **free/discounted**.
Simultaneously collect containers free basic metrics and chargeable container metrics. The free collector resources are calculated based on the proportion of container free basic metrics data.
Calculation method: Free resource amount = Total collector resources used by integration containers × (Container free basic metrics data / Total container metrics data)
If only containers free basic metrics is collected, fees for collector resources used by integration TKE will not be charged.
Integration center: Charges are based on collector resources used by the integration type.

Billing Mode Description

Billing mode	Payment Mode
Pay-as-you-go (postpaid)	On-demand use. Fees will be charged based on your actual resource usage upon settlement.

Collector Pricing

Calculation Formula

Total cost = CPU usage (unit: cores) × Collector CPU unit price + Memory usage (unit: GiB) × Collector memory unit price

Billing Item Description

Billing Item	Description
Collector CPU	Cumulative calculation is based on the CPU usage and memory usage per hour.
Collector memory	

Fee Deduction Cycle

©2013-2022 Tencent Cloud. All rights reserved.

Bill per hour. TMP sends a billing push and settles costs daily based on your resource usage in the previous hour.

Collector Price

Non-finance zones in the Chinese mainland, such as Guangzhou, Shanghai, and Beijing.

Billing Item Name	Price (USD)
Collector CPU	0.014 USD/Cores/Hour
Collector memory	0.006 USD/GiB/Hour

finance zones in the Chinese mainland + in the regions outside the Chinese mainland (Hong Kong (China), Macao (China), Taiwan (China), and overseas), such as Hong Kong (China)

Billing Item Name	Price (USD)
Collector CPU	0.017 USD/Cores/Hour
Collector memory	0.007 USD/GiB/Hour

Billing Examples

Example 1:

Assuming a user in Guangzhou uses 2 CPU cores and 4 GiB of memory for an hour, the cost for this hour would be:**2 × 0.014 + 4 × 0.006 = $0.052**

Example 2:

Assuming a user in Hong Kong (China) uses 2 CPU cores and 4 GiB of memory for an hour, the cost for this hour would be:**2 × 0.017 + 4 × 0.007 = $0.062**

Purchase Methods

Last updated：2024-01-29 15:55:08

This document describes how to purchase a TMP instance.

Prerequisite

You have signed up for a Tencent Cloud account and completed identity verification.

Pay-as-You-Go

1. Log in to the TMP purchase page and configure the following instance information.

Item	Description
Billing Mode	Select “pay-as-you-go”.
Region	Select the region where your business needs to be deployed. **Note:** Tencent Cloud services in different regions cannot communicate with each other over the private network; for example, a service in the Guangzhou region cannot report data to a TMP instance in the Shanghai region over the private network. Once an instance is purchased, the region cannot be changed. Therefore, you need to select the region with caution.
Availability Zone	Select an AZ supported by the region.
Network	VPC is supported. We recommend you choose the same VPC in the same region as your monitoring target. For more information, see Network Environment.
Data Retention Period	Select the data retention period. In the pay-as-you-go billing mode, fees are charged based on the daily reported metric data volume and the data retention period. For more information, see Product Pricing.
Instance Name	Enter an instance name.
Grafana Password/Confirm Password	Enter the password of Grafana that comes with the instance. The account is `admin` by default. **Note:** The password must begin with a letter or digit and contain at least one special symbol (`@$!%*#?&`), and its length should be between 6 and 24.

©2013-2022 Tencent Cloud. All rights reserved.

Tag	Enter a tag for the instance (optional).
Validity Period	Select the validity period of the instance.

2. Read and indicate your consent to related terms of agreement, and then click **Buy Now**.
3. On the payment page, select a payment method and pay.
4. You can enter the instance list page after the purchase. The instance will be in **Creating** status, and you can use it after around 3-5 minutes when its status changes to **Running**.

Subsequent Operations

Quickly get started with TMP.

©2013-2022 Tencent Cloud. All rights reserved.

Payment Overdue

Last updated：2024-01-29 15:55:08

Note:
If you are a customer of a Tencent Cloud partner, the rules regarding resources when there are overdue payments are subject to the agreement between you and the partner.

Alerting

From seven days before your resource expires until the resource is released, the system will send an alert to your Tencent Cloud account creator, global resource collaborators, and financial collaborators via email, SMS, and other methods as configured in the message subscription in the Message Center.
During this period, the alert will be sent once every day.

Repossession

You will receive renewal notifications from seven days before your TMP resource expires.
The resource can be used within seven days after it expires, during which you will receive expiration alerts. Please renew it as soon as possible.
From the eighth day after the resource expires, it will remain unavailable yet can be renewed, and instances will be suspended.
If you do not renew the resource **seven days after it becomes suspended**, it will be repossessed, and related data will be cleared and cannot be recovered.
In other words, the TMP resource will remain **available for seven days** after the expiration and become **unavailable for another seven days**. You can renew it within the 14 days. If your balance is sufficient and auto-renewal is enabled, the resource will be automatically renewed upon expiration.

Pay-as-You-Go — Unit Price for One-Year/Two-Year Data Storage

Last updated：2024-01-29 15:55:08

TencentCloud Managed Service for Prometheus (TMP) instances are billed based on the period of data storage. The billing rules for one-year and two-year data storage only differ in the unit price, as described below. For more billing rules, see Pay-as-You-Go.

Instance Price

Unit price for one-year data storage

Non-finance zones in the Chinese mainland, such as Guangzhou, Shanghai, and Beijing

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	0.83
200-800	0.79
800-1,500	0.75
Above 1,500	0.74

Regions outside the Chinese mainland + finance zones in the Chinese mainland, such as Hong Kong (China), Singapore, and Shenzhen Finance

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	1.65
200-800	1.57
800-1,500	1.49
Above 1,500	1.47

Unit price for two-year data storage

Non-finance zones in the Chinese mainland, such as Guangzhou, Shanghai, and Beijing

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)

©2013-2022 Tencent Cloud. All rights reserved.

0-200	1.81
200-800	1.76
800-1,500	1.71
Above 1,500	1.7

Regions outside the Chinese mainland + finance zones in the Chinese mainland, such as Hong Kong (China), Singapore, and Shenzhen Finance

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	3.61
200-800	3.51
800-1,500	3.42
Above 1,500	3.4

©2013-2022 Tencent Cloud. All rights reserved.
