Getting Started
Enabling Control Center

Last updated：2024-11-26 09:22:42

Overview

Control Center enables enterprises to centrally manage their multiple Tencent Cloud accounts. To use the Control Center for the first time, a Tencent Cloud root account verified with enterprise identity is required to serve as the admin account of the Organization to enable and use the Control Center. Note that you cannot use the Control Center with an account verified with individual identity.

Prerequisites

The identity of the current account has already been verified.
The current account is a root account of Tencent Cloud Organization, a sub-user.

Directions

1. Log in to the Tencent Cloud console and go to the Control Center page.
2. Click **Configure landing zone** and grant necessary permissions. Then Control Center is enabled and available.

Configuring a Landing Zone

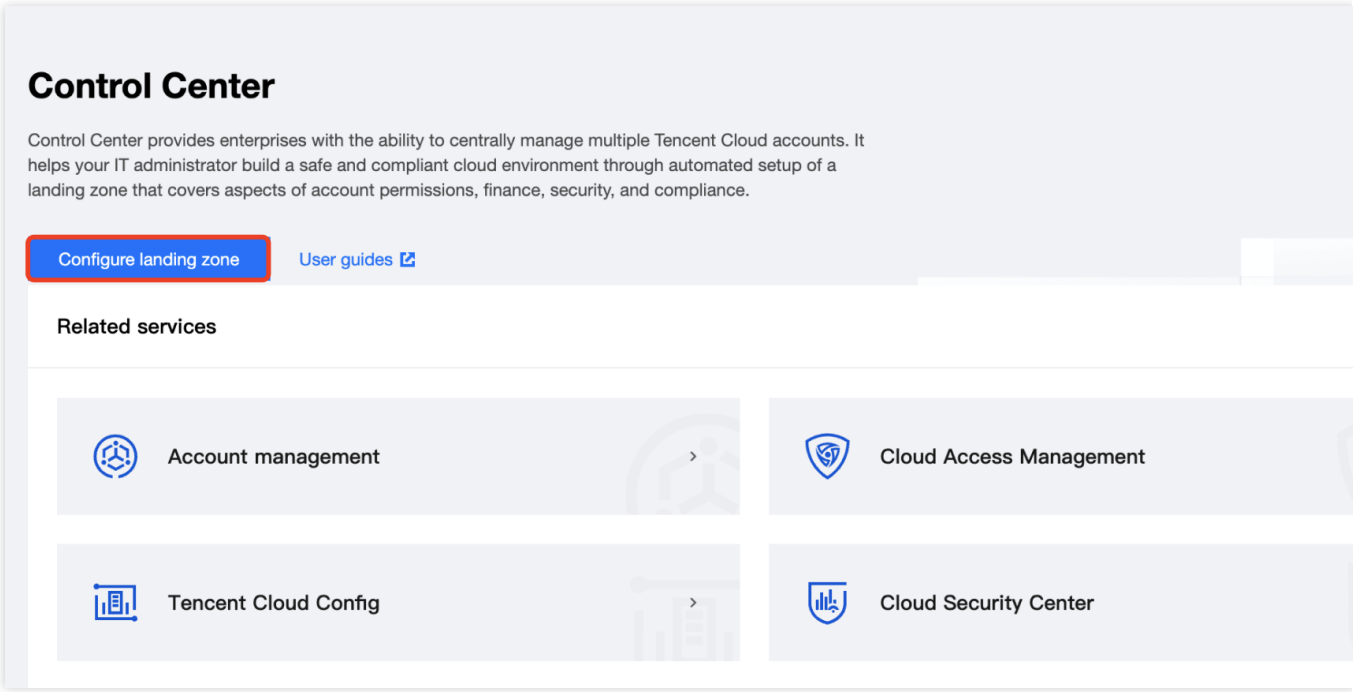
Last updated：2023-12-24 10:24:39

Overview

In Tencent Cloud Control Center, a landing zone provides a top-level framework for enterprise cloud migration. It enables enterprises to rapidly establish a cloud environment aligned with best practices. You can configure the organizational structure, core accounts, financial policies, security rules, and compliance auditing in a landing zone in a few simple steps. This document describes how to quickly configure a landing zone.

Directions

1. Log in to the Tencent Cloud console and go to the Control Center page.
2. Click **Configure landing zone**. If this is the first time you use this feature, you need to grant Control Center the permissions to create roles and call other cloud service interfaces.



3. On the **Landing zone** page, you can add or delete configurations and click a configuration to specify its details. Completed configurations are marked with

©2013-2024 Tencent Cloud. All rights reserved.

.

Click **Add configuration** to add a configuration.

To set up the department configuration, see Managing Departments.

To set up the core account configuration, see Managing Core Accounts.

To set up the financial policy configuration, see Configuring Financial Policies.

To set up the security rule configuration, see Managing Security Rules.

To set up the permission configuration, see Managing Permissions.

To set up the CloudAudit log shipping configuration, see Managing CloudAudit Log Shipping.

To invite existing accounts, see Inviting Existing Accounts.

Note:

Manage departments, Manage core accounts, and Configure financial policy are mandatory configurations and cannot be deleted.

To delete a configuration, click

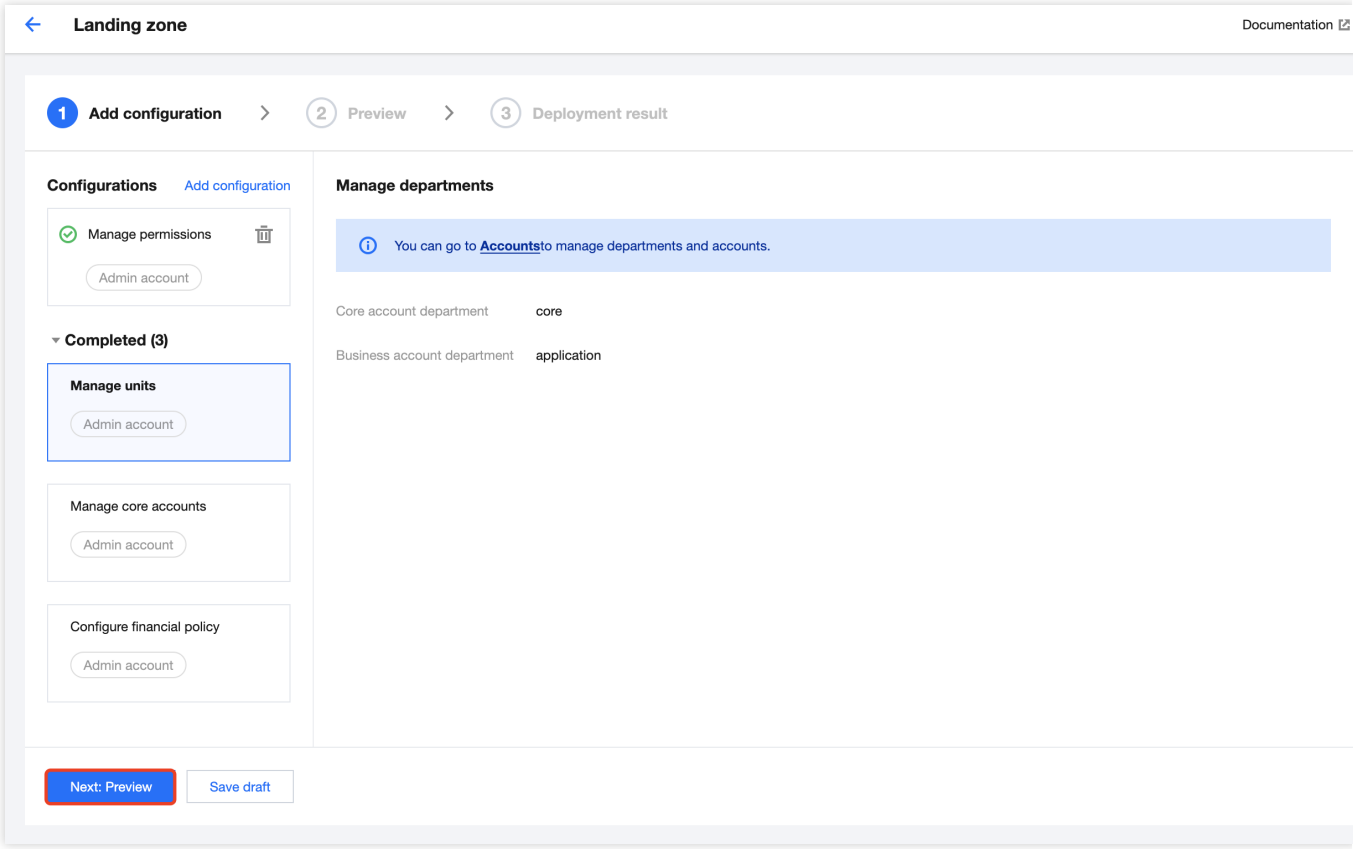
next to the configuration.

Note:

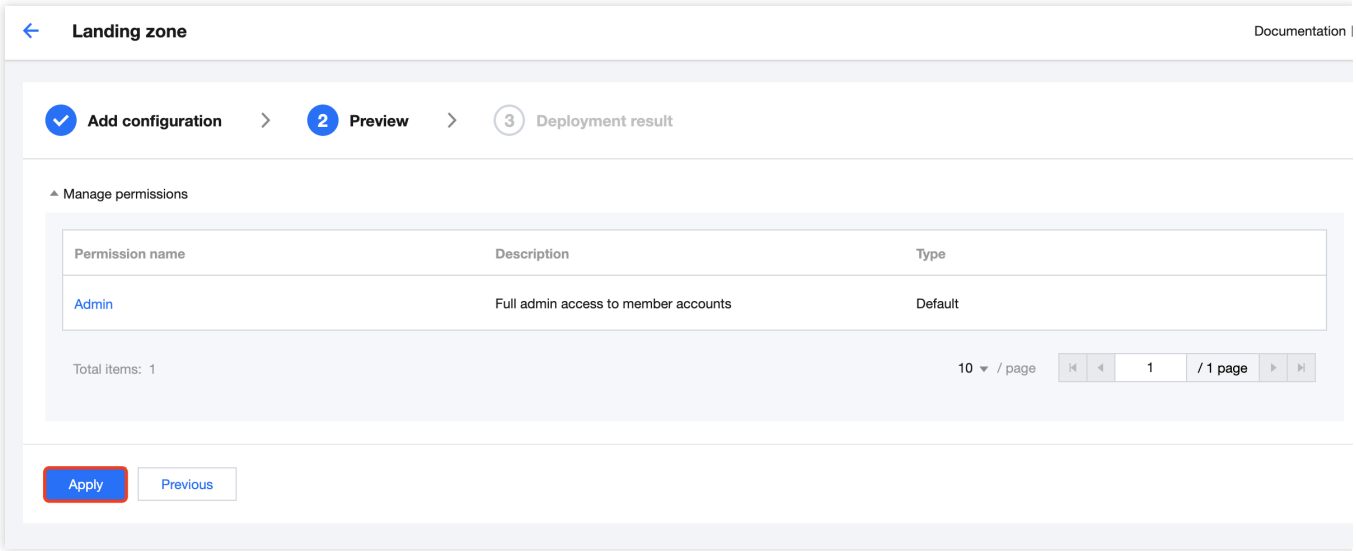
If you fail to set up a configuration, you cannot delete the configuration.

4. After all configurations are set up, click **Next: Preview** or **Save draft** for future submission.

©2013-2024 Tencent Cloud. All rights reserved.



5. On the **Preview** page, if any modifications are required, click **Previous** to return to the **Add configuration** page. If the information is accurate, click **Apply**.



6. After all configurations are applied, the landing zone is set up. If any failures occur, view the error message and click **Edit** to modify the configurations with failures.

7. To set up more configurations, go to the **Landing zone** page and click **Continue setup**.
