Update	Description	Release Date	Documentation
Launched CloudApp	CloudApp is a platform for managing the full lifecycle of cloud applications. It helps customers to use their Tencent public cloud accounts to quickly procure, automatically deploy, and easily manage software and underlying Tencent Cloud resources required for the applications. CloudApp has four advantages: transparent software and hardware procurement, automated deployment and installation, private running environments, and user-friendly Ops management, improving cloud application management efficiency and meeting their requirements for data security and privacy.
