This document introduces the billing information related to the CloudApp services.

Billing Overview

CloudApp is currently in the public beta period. No platform usage fees are charged during this period. Only the Tencent Cloud resource costs used during application deployment are charged.

Billable Item	Description	Billing Mode
CloudApp platform	During the beta test of the CloudApp platform: Users do not need to pay platform usage fees. If charges are incurred in the future, Tencent Cloud will release a separate announcement on the official website. Service providers do not need to pay for services of the CloudApp platform. The subsequent charging plan will be separately announced once it is finalized.	N/A
Software	The software is priced by service providers. Customers only need to pay according to the software price displayed on the detail page.	The application billing mode is determined by the service provider.
Cloud resource	Application deployment triggers the creation and consumption of cloud resources. Payments generated by using the cloud resources, such as CVM instances, are charged according to the cloud resource billing rules.	See the relevant product documentation. For example, when using CVM instances, see Billing Overview for the billing mode.

Renewal, Overdue Payment, and Refund

During the beta test, CloudApp does not charge platform service fees to users and service providers. For operations related to software and cloud resource payment, renewal, overdue payment, refund, and the like, see the respective product documentation.
