Release Notes

Last updated: 2026-09-10 16:56:06

August 2026

Update	Description	Release Date	Documentation
Address Book Capability Added to Rule Groups	Supports the use of multi-account address books by boundary firewalls (Internet boundary, VPC boundary, and NAT boundary) and enterprise security groups. In a multi-account environment, address objects can be reused across accounts, reducing duplicate creation.	2026-08	Rule Group
Added Log Analysis	Supports unified management of multi-account CFW logs, allowing users to view and search CFW logs of managed accounts under the current account.	2026-08	Member Management
Add Centralized Management for Network Detection and Response Toggle	Supports unified management of Network Detection and Response (NDR) switches in multi-account CFW, allowing users to enable, disable, or view the NDR switch status of each account.	2026-08	Network Detection and Response Toggle
Policy Management Optimization	- Address templates can be referenced by domain names in Internet Boundary / NAT Boundary / VPC Boundary rules. When a rule group is created, the effective account list displays only accounts that have been onboarded or have purchased CFW. - Policy analysis supports analyzing deployed rules that reference multi-account address books, identifying rule conflicts, redundancies, and high-risk items after address template expansion.	2026-08	Rule Group Policy Analysis

July 2026

Update	Description	Release Date	Documentation
Add Firewall Toggle Centralized Management	Supports centralized management of firewall toggles across multiple accounts, covering three types: Internet boundary, NAT boundary, and VPC boundary, and logs CloudAudit records. Improves the configuration and auditing experience for cross-account firewall toggles.	2026-07	Firewall Toggle
Add Security Group Centralized Management	Supports centralized management of Private Network – Security Group, adapts to multi-account and cross-region scenarios, provides both security group and instance views, and supports assuming a login to configure security group rules. Integrates policy analysis to identify and remediate rule conflicts, redundancies, and high risks, addressing the issues of scattered and frequently conflicting security group policies in multi-account environments, thereby improving network security Ops efficiency and consistency.	2026-07	Rule Management
Policy Management Optimization	• Adds support for four asset types: EKS, ES, VDB, and CKAFKA, thereby expanding the asset coverage scope of unified policy protection. • You can manually trigger an asset sync to obtain the latest asset information. • The rule management experience is optimized, and new features such as a quick entry for rule group editing and enabling managed reminder are added. • The Policy Analysis feature adds a security group ID filter, enabling you to quickly locate the policy analysis results for a target security group.	2026-07	• Rule Management • Rule Group • Policy Analysis
Member Management Optimization	• CFW supports the pay-as-you-go billing mode. Pay-as-you-go accounts can be connected to the centralized multi-account management capability.	2026-07	Member Management

- CFW supports enabling the managed capability for trial accounts and optimizes the account group editing interaction.

May 2026

Update	Description	Release Date	Documentation
Added Access Control Policy Management	Supports managed CFW access control policies, including internet boundary rules, NAT boundary rules, and VPC boundary rules. Supports centralized management of multi-account policies.	2026-05	• Rule Management • Rule Group
Added Mult Account Management and Specification Sharing	Supports multi-account member access management and CFW specification sharing.	2026-05	• Member Management • Specification Management
Added Policy Analysis	Supports policy analysis for VPC security groups/CFW enterprise security groups. Intelligently analyzes and identifies redundant, conflicting, and invalid configurations, provides optimization suggestions, and effectively improves rule quality and product operation and management efficiency.	2026-05	Policy Analysis
Added Mult Account Management Overview	Supports multi-account policy management, policy analysis, specification information, and managed account statistics. Supports one-click rule deployment and policy analysis.	2026-05	Overview

Product Announcements

Last updated: 2026-10-13 16:42:24

The following are recent announcements for FWM. Please pay attention to them. For more announcements, see [Service Notifications](#).
