### How to purchase Face Fusion?

Face Fusion supports two billing modes: Billing Based on Call Count and QPS billing

If you select call volume billing, Face Fusion supports both prepaid and pay-as-you-go modes. If pay-as-you-go billing is used, Face Fusion offers call volume resource packages of different specifications, which you can select at [Purchase Page](#). After the resource package is exhausted or expired, it will automatically switch to the pay-as-you-go billing for settlement; if you directly use pay-as-you-go billing, there is no need to purchase it separately. The system will count the total number of interface calls for the previous month and generate a bill for automatic settlement and deduction on the 1st to 3rd day of each month.

If you select QPS billing, Face Fusion supports purchasing QPS daily or monthly. You can go to [Purchase Page](#) to select.

After activating the Face Fusion service, the system will automatically grant 10 free material quotas. If more material quotas are needed, they must be purchased separately on the [Purchase Page](#). For details, refer to [Billing Overview](#).

### Can an invoice be issued?

You can apply for an invoice at **Face Fusion Console > Billing Center > Bills > Invoicing**.

# Integration and Usage

Last updated : 2024-09-29 20:09:26

## Is free trial supported?

After the Face Fusion service is activated, free call quotas will be delivered in the form of free resource packs and will be used for deduction first in respect of billing and settlement. Once the free resource pack is consumed, if you have purchased a call volume resource pack, the paid resource pack will be used. If you have not purchased a resource pack or the resource pack is exhausted or expired, it will automatically switch to pay-as-you-go billing.

Face Fusion also supports testing effects in the [console](#). After creating an activity, click **Material Management > Test Result** to quickly experience fusion effects.

## What happens when the free quota is used up?

In the call volume billing mode, once the free quota is used up, you can either purchase a resource pack or opt for pay-as-you-go billing. The settlement order is: **Free Resource Pack > Paid Resource Pack > Pay-as-you-go**.

## Is the call volume displayed in real time on the console?

Yes.

## Is sub-account supported?

Yes. Create a sub-account first. Log in to Tencent Cloud [CAM Console](#) using the root account. On the left sidebar, select **Users > User List**. On the **User List** page, click **Create User** to create a sub-account.

## What are materials and material quotas?

Materials refer to the Face Fusion template images designed by yourself. It is recommended to design materials around user usage and sharing scenarios, adhering to the principles of being attractive, interesting, or useful. Material quotas refer to the total number of materials that can be created and used. For details, refer to [Material Quota Description](#).

## How to query the activity ID (ProjectId) and material ID (ModelId) of Face Fusion?

Log in to [Face Fusion Console](#), and click **Material Management** in the left navigation bar to enter the activity management page, where you can view the activity ID in the activity list. Click **Material Management** to enter the material management page, where you can view the material ID in the material list.

## What are the requirements for face quality and pose?

Face Fusion supports styles such as real people, cartoons, and oil paintings. It is recommended that the facial features be as close to real people as possible, with evenly lit frontal faces being the best. Tilting the head up or down, turning sideways, showing teeth, and closing eyes may affect the effect. It is recommended to make adjustments based on actual test results.

## Does it support images with side profiles?

Fusion is possible as long as the facial features are clear. To ensure good results, it is recommended to upload frontal photos as much as possible. You can add a prompt like "Upload a clear frontal headshot" on the photo upload page.

## How are images with side profiles determined?

You can use Tencent Cloud [Face Detection and Analysis Interface](#) for assessment. By setting return of **Face Infos**, you can obtain the vertical and horizontal offset values of the face posture. It is recommended to guide re-uploads when the values exceed 30.

## Does it support multi-face fusion?

Yes, it supports up to 6 faces for fusion in the same photo simultaneously.

## Is there a time limit for material replacement?

Material quotas take effect permanently after purchase, and there is no time limit for material replacement. When the material quota does not meet your needs, you can delete some materials and replace them with new materials to free up space. If there are no materials to be deleted, it is recommended to purchase additional material quotas as needed.

## Which materials require copyright certificates?

When materials involving celebrities, brand logos, and non-self-designed images are used, you must submit copyright certificates. Tencent Cloud is not responsible for any disputes arising from copyright issues.

## Where can I download the copyright certificate template?

Click here [Face Fusion Copyright Certificate Template](#) for download.

## What are the requirements for issuing a copyright certificate?

After downloading the certificate template, you need to fill in the company name, AppID, activity name, and event ID, sign it with the date, and affix the official seal (if applicable). The **Original Copyright Statement** must be filled in and duly executed by the activity applicant, and the **Copyright Authorization Statement** must be filled in and duly executed by the copyright owner.

## How to submit the copyright certificate?

After both the original copyright and authorized copyright statements are duly executed, you can take a photo of the documents or scan the documents. Submit a copy of the photo or the scanned document in the [Face Fusion Console](#) > **Material Management** > **Material Management** in an activity > **Upload Copyright Evidence**.
