Domain Registration Registration Guide

Last updated : 2024-10-24 18:07:40

Domain registration is essentially to pay for the right to use a domain for one or multiple years. You can easily get your domain in several simple steps:

Step 1. Query the domain

Before registering a domain, you need to query whether the domain or its suffix has already been registered by somebody else, and if so, you need to choose an unregistered domain or suffix before proceeding to the next step.

1. Log in on the [Domain Registration](#) page.
2. On the **Domain Registration** page, enter the target domain and suffix and click

to view its registration status as shown below:

For example, enter `example.com` .

Domains

Notes Domain Price Help Domains C

Single Query Bulk Query

Enter a domain, e.g., qq.com

All .com .net .org .xyz .baby .bar .design .fans

You have not searched for a domain. Enter the domain in the search box above.

Shopping Cart

You have not purchased any domain.

Purchase Now

If the returned query result shows **Registered**, the domain has already been registered, and you need to change the domain or suffix.

If the returned query result shows **Add to Cart**, the domain can be registered.

Step 2. Add to cart

1. Select the domain to be registered such as `example.com` and click **Add to Cart**.

Note:

You can also add multiple suffixes to protect your brand; for example, you can add `example.cn`, `example.net`, and `example.org` to the cart.

2. In the **cart** on the right, click **Purchase Now**.

Step 3. Enter the domain information

1. On the **Submit Order** page, confirm the domain purchase term, enter the domain information, and select **I have read and agree to Tencent Cloud Domain Registration Agreement and Tencent Cloud Privacy Policy**.

In the domain information, 1, 2, 3, 5, and 10 years are displayed as purchase term options by default. If you want to select another period such as 7 years, click **Other** and select 7 years.

You can enter the domain owner information in the following two ways:

If you have purchased a domain before, you can use the previously entered domain information.

If you want to use new domain information, we recommend you create a template as shown below:

Note:

You can also select **Create Template** and register the domain as prompted.

If you want to set auto-renewal upon domain expiration, select **Enable auto-renewal**.

2. Click **Submit Order**.

Step 4. Check the information

1. On the **Check Information** page, check whether your domain information, purchase term, and fees are correct.

2. Click **Confirm** to enter the payment page.

Step 5. Make the payment

On the **Payment** page, select a payment method as appropriate.

Note:

After making the payment, you can view/manage your domain in [My Domains](#).

If you need an invoice, you can apply for it in **Cost > Cost Center > Invoice and Contract > Invoice Management**.

FAQs

[Can I refund after successfully registering a domain?](#)

If you encounter any problems during domain registration, you can try troubleshooting as instructed in Registration Process. If the problem persists, contact [technical support](#) for assistance.

.ai Domain Registration

Last updated : 2024-11-27 15:02:44

The .ai domain is the country/territory top-level domain for Anguilla. It is managed by DataHaven. The rules for registering an .ai domain are different from those for other suffixes. Please pay attention to the following information before registering a domain.

Supported Suffixes

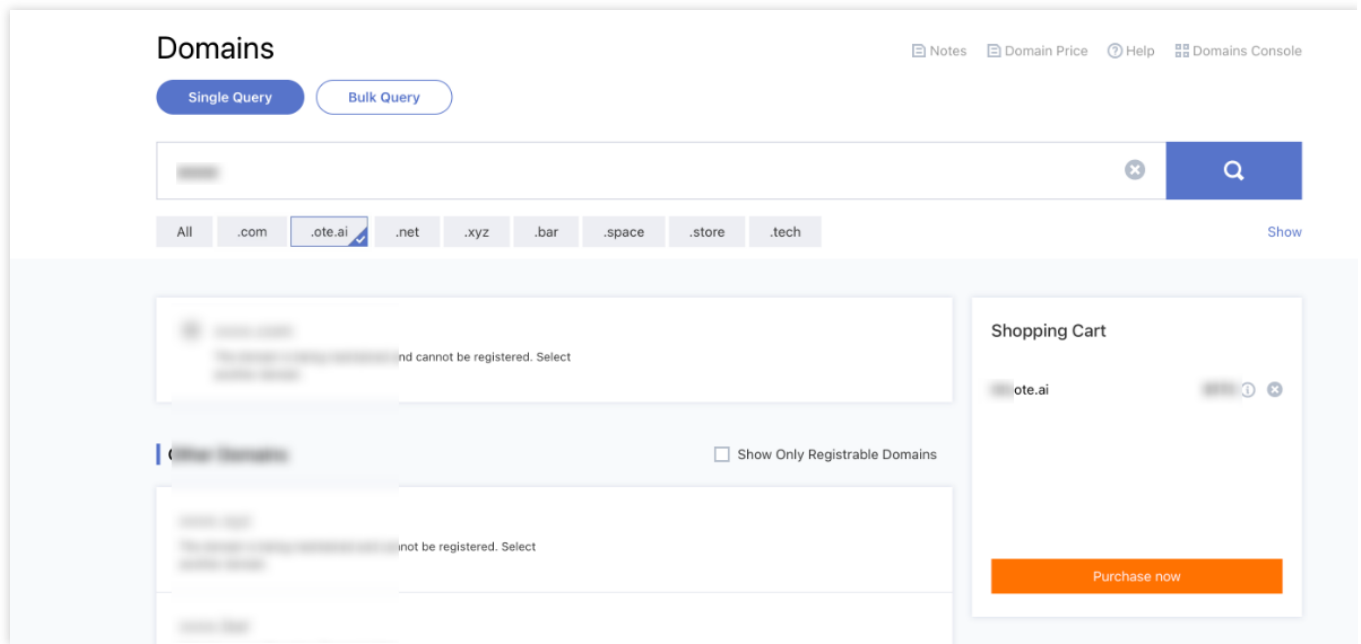

The .ai domain supports registration of multiple second-level domains, in addition to registration of the top-level domain. Currently, Tencent Cloud only supports top-level .ai domain be registered and transferred in.

Suffix	Type	Current Support
.ai	Top-level domain	Supports new registration and transfer-in.
.com.ai	Second-level domain	Supports new registration and transfer-in.
.net.ai	Second-level domain	Supports new registration and transfer-in.
.off.ai	Second-level domain	Supports new registration and transfer-in.
.org.ai	Second-level domain	Supports new registration and transfer-in.

Registering an .ai Domain

Step 1: Selecting the .ai Suffix on the Search Page

1. On the [Domains](#) page, enter and search for the prefix of the domain you want to register. Add the unregistered .ai domain to **Shopping Cart**.

**Note:**

The .ai domain do not support Chinese prefix characters.

According to the DataHaven registry rules, new registration or renewal of .ai domains does not support 1-year term. All new registrations support at least 2 years. Therefore, in **Shopping Cart**, the total price for a new .ai domain is the sum of new registration price for 1 year and renewal price for 1 year. For more pricing details, refer to [Domain Price](#).

2. On the **Shopping Cart** panel, click **Purchase now**.

Step 2: Selecting the Domain Registrant**Note:**

The .ai domains currently do not support auto-renewal. Please do not select the **Enable Auto-renewal** option, otherwise, an error will be prompted.

1. Select the domain registrant. If you need to create a domain registrant, refer to [Domain Registrant Profile](#).

If you need to use new domain registrant information, [create a registrant profile](#).

Total **Submit Order**

2. Read the **Tencent Cloud Domain Name Registration Service Agreement** and the **Tencent Cloud Privacy Policy** carefully, select the checkbox next to it and then click **Submit Order**.

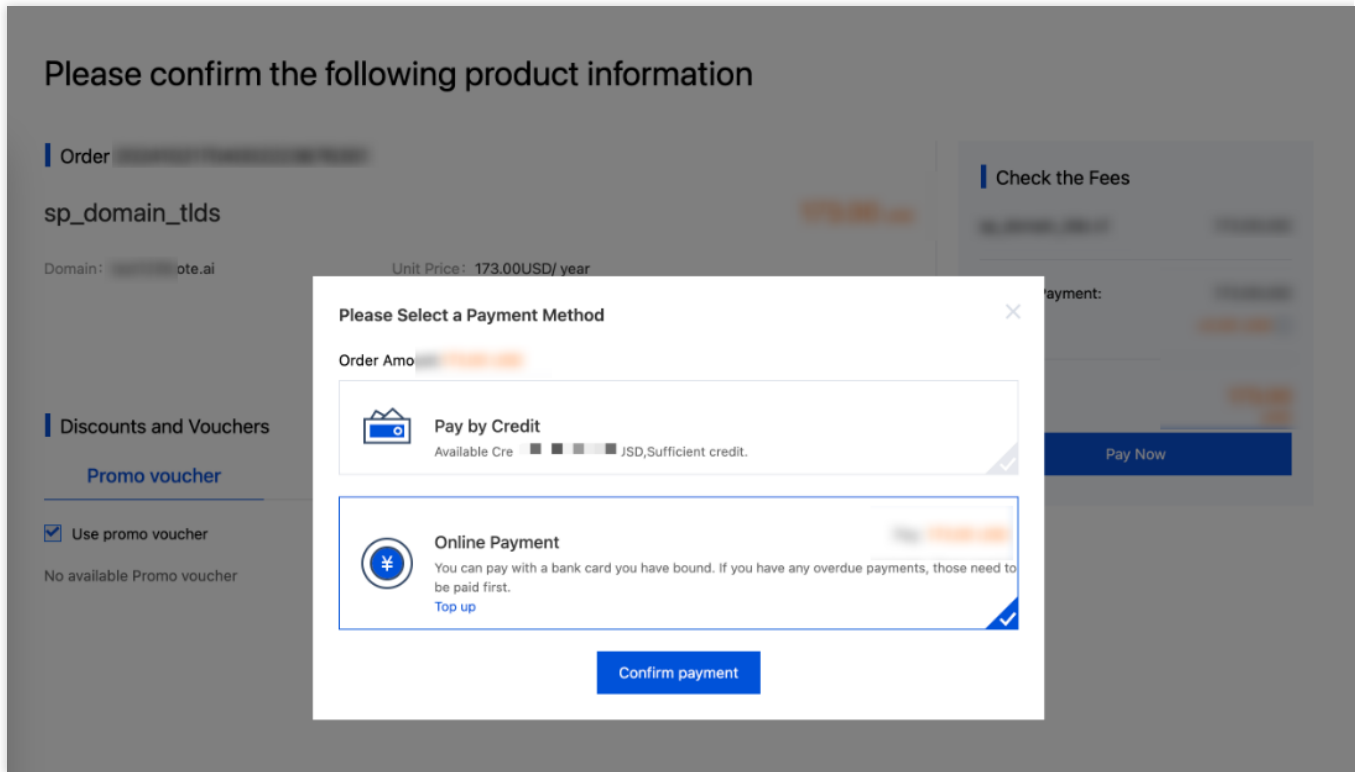

Enable Auto-renewal (We will renew your domain automatically before its expiration. Make sure your account has sufficient balance. You can disable it in the domain list anytime.)

I have read and agree to [Tencent Cloud Domain Name Registration Service Agreement](#) and [Tencent Cloud Privacy Policy](#).

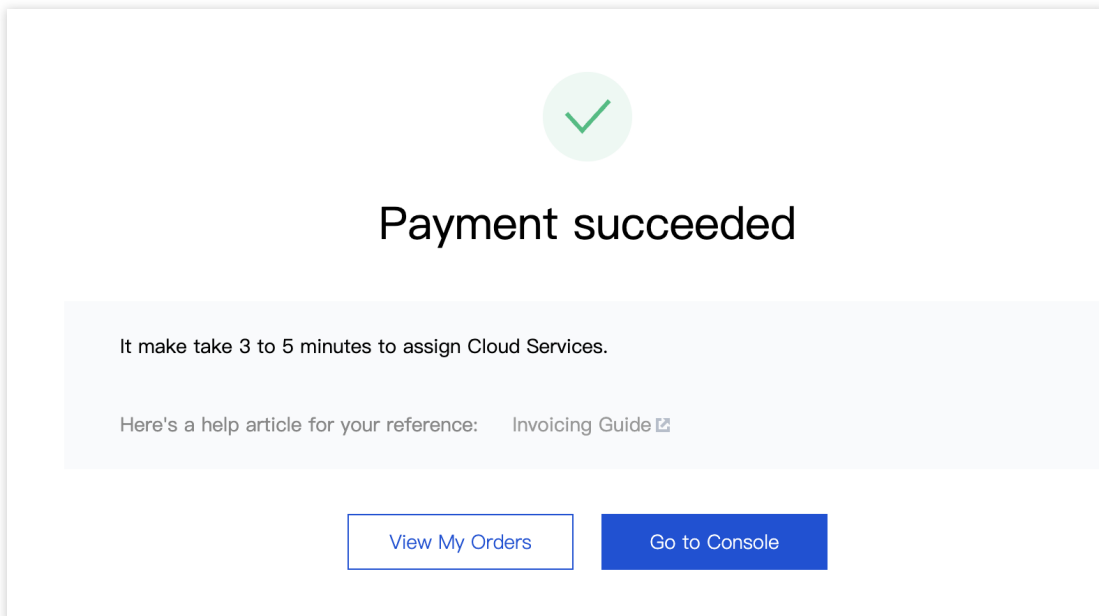

Total **Submit Order**

Step 3: Completing the Payment

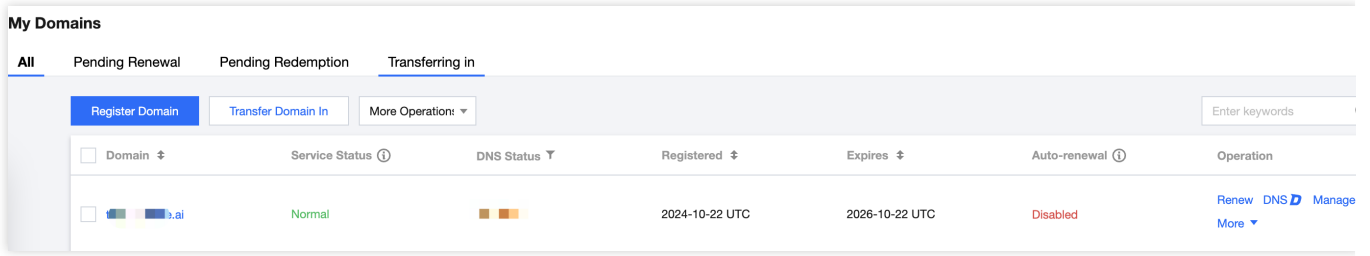

1. On the order confirmation page, click **Submit Order**. In the pop-up dialog, complete the payment by using **Pay by Credit** or **Online Payment**.

2. When the payment is completed, click **Go to Console** to view the domain.

3. After the payment, Tencent Cloud will request the registry for the registration result, which usually takes several minutes to a few hours. The domain status in the console will show as **Registering**. Once the domain is successfully registered, the status will change to **Normal**, and more options will be displayed in the **Operation** column.

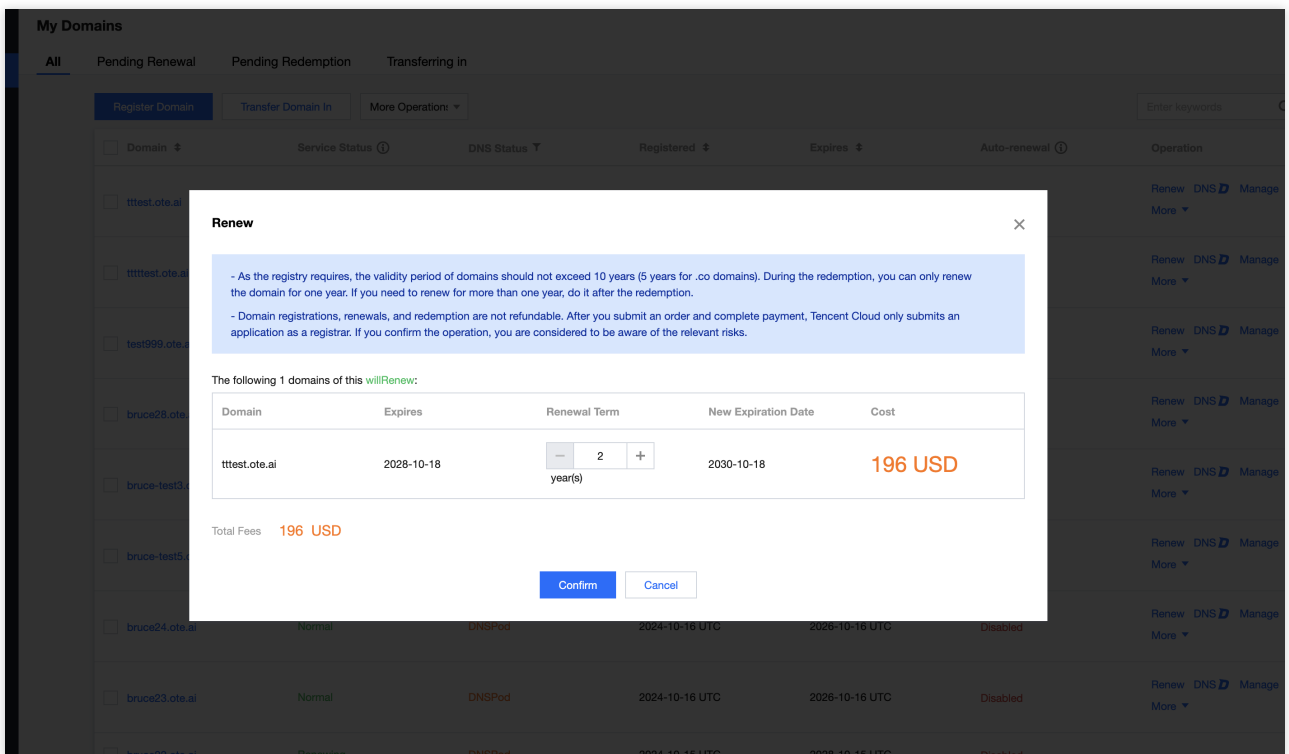

Renewing an .ai Domain

On the [Domains](#) page, select the domain to be renewed, click **Renew**, and follow the instructions in the pop-up dialog.

Note:

Renewal does not support 1-year term. All .ai domains must be renewed for at least 2 years.

Transferring In an .ai Domain

1. On the [Domains](#) page, click **Transfer Domain In**, enter the domain and transfer code, and select the domain registrant information to apply for transferring the domain to Tencent Cloud.

Note:

Please apply for the transfer code from the original domain provider.

The .ai domains currently do not support auto-renewal. Please do not select the auto-renewal option.

When successfully transferred, the domain will be extended automatically for 2 years.

Transfer requires the upstream registry to change the registration, which usually takes 3-7 days. Please check the transfer progress and result in the console.

2. Follow the page instructions to pay for the order.
